Coenzyme Q10

Chemical overview

Chemical name	Coenzyme Q10	Synonyms and Related Compounds	CoQ10, Coenzyme Q10, Ubiquinone-10
CAS #	303-98-0	Formula	C ₅₉ H ₉₀ O ₄
Specifications	Appearance: Yellow to orange crystalline powderÂ Assay: 99.0% - 101.0% Analysis standard: FCC/USP/BP/Ph. Eur. Kosher, Halal, Non-GMO, Vegan, Gluten Free, Dairy Free		
Packaging	25 kg net weight carton with two inner plastic linings and vacuum-sealed bag.		
Applications	Supplements (tablets, capsules), anti-wrinkle, anti-aging, sunscreen, moisturizer, lotion		
Description	Coenzyme Q10 is involved in aerobic metabolic processes and present in all eukaryotic cells and naturally synthesized by the human body. It is found in various food sources and particularly in fish and meat. It is commonly taken as a supplement for heart health, headaches, and muscle health but also by individuals with impared biosynthesis of CoQ10.
