Xylitol

Chemical overview

Chemical name	Xylitol	Synonyms and Related Compounds	E967
CAS #	87-99-0	Formula	$C_5H_{12}O_5$
Specifications	Appearance: White crystals Assay: 98.5% - 101.0% Analysis standard: FCC/USP/BP/Ph. Eur. Kosher, Halal, Non-GMO, Vegan, Gluten Free, Dairy Free		
Packaging	25 kg net weight carton with two inner plastic linings and vacuum-sealed bag.		
Applications	Dental care, Beverages, fruit juices, tabletop sweetener, protein powder, dairy products, chewing gum, toothpaste, desserts, sauces, baked goods		
Description	Xylitol is a naturally occuring sugar alcohol and polyol that is 95% as sweet as sucrose but with reduced calories. Xylitol is used synergistically with high-intensity sweeteners to mask aftertastes and most commonly used in dental care products. Its stability at high temperatures allow xylitol to be used in baking application where aspartame would be unsuitable.		

Please reach out to Suzhou-Chem Inc. with any question regarding Xylitol. We would be happy to provide a quote, a sample, or further information regarding its uses and availability.
